*Upskilling Tasmanians since
1987*

Australian Employment Services

A.E.S. is a Tasmanian owned and operated company which has been successfully training Tasmanians since 1987.

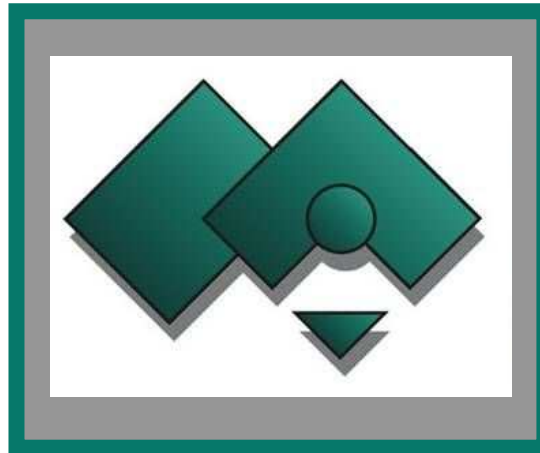

With a training and assessment team that is renowned throughout the industry as leaders in their areas of expertise A.E.S. can not only deliver all your training requirements but exceed your expectations as well.

The majority of our training is nationally accredited, however we continue to offer training specific to our clients needs where they extend beyond this. A.E.S. delivers customised training to groups and individuals. Information based sessions are normally run indoors using a variety of aids and styles. Skills based sessions are delivered in a safe, realistic environment, often outdoors, using equipment and procedures comparable to those encountered on the job.

A.E.S's assessment services incorporate Recognition of Prior Learning (RPL) ensuring that individuals receive formal recognition for current competencies and that any training required will add value to themselves and their employers.

Qualifications provided in:

- Civil Construction
- Local Government
- Horticulture
- Water Operations
- Business
- Warehousing
- Building and Construction

CGU Insurance

Are you insured with CGU? If you have your Workers Compensation insurance through CGU you may be entitled to a rebate from CGU for training in the areas of:

- Work Safely at Heights
- Prepare Work Zone Traffic Management Plans
- Risk Assessment
- OHS Harmonisation
- Confined Space
- Employee Safety Representatives

Funding

Regardless of your trainee being a new or existing employee, in most cases Government funding is available to cover the cost of having your employees trained.

Our friendly staff can assist you in finding if and where funding is available for your employees.

“Experienced & knowledgeable trainers”

Training and Assessment Team.

With a team of trainers and assessors that is widely regarded as industry experts in their chosen fields, AES is able to offer training and in depth assessment that is current and relevant to today's industry.

Our trainers and assessors not only train in their fields but also maintain the currency of their skills through constant industry involvement and keeping abreast of new techniques and equipment being developed for industry.

Development of Training.

Through AES's continuous improvement program, AES is always looking to develop and improve training techniques and equipment used for training.

A program of consultation with industry is maintained to ensure that our courses are developed with the best interests of our clients needs in mind. Ensuring that topics covered are relevant and current to industry practices and industry equipment.
