

Short Term Low Impact Worker

Course Outline:

Short Term Low Impact (STLI) works are those conducted without the assistance of accredited Traffic Management personnel, and in accordance with simplified Traffic Guidance Schemes. STLI deals specifically with short term worksites where a site-specific risk assessment has determined that the work can be undertaken without the use of a Static Worksite (as defined in the Austroads Guide to Temporary Traffic Management – AGTTM Part 3).

If the works are minor in nature, for example pothole repairs, vegetation trimming, or can be performed quickly along multiple sites then a mobile or short term, low impact worksite may be appropriate. (see AGTTM Part 4)

More information can be obtained from the Department of Transport website, [here](#)
